THE GROWTH GAP: BUILD BRAND. BUILD DEMAND BY HIGH BEAM

Most eCommerce brands ask customers to buy before they give them a reason to care. That is where growth stalls. Their ads capture demand from people ready to buy, but they do not create enough demand with everyone else. As markets get more crowded, brands

need to create demand, not just capture it. In this session, High Beam Marketing co-founder Chandler Lyles will show how brand shapes what customers notice, trust, and choose. Attendees will leave with a simple way to use attention, emotion, and the right message at the right time to build demand before they try to capture it.
